

3.164:950-I/963/4

United States Foreign Trade

SUMMARY REPORT
FT 950-I

April 1963

FOR RELEASE
June 14, 1963

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that United States general imports for April (unadjusted for seasonal variation) which were at about the same level as March (\$1,461.3 million compared to \$1,462.8 million) reflected decreases in imports from some areas which were offset by increases in imports from others.¹ Changes in the dollar values of imports from all areas from March to April were as follows: Latin American Republics, from \$324.1 to \$298.3 million; Western Europe, from \$426.5 to \$407.2 million; Canada, from \$285.2 to \$327.1 million; and "all other countries", from \$427.1 to \$428.6 million.

From March to April, imports from sterling area countries fell from \$285.2 to \$250.2 million, while those from O.E.C.D. countries in Europe decreased from \$417.7 to \$400.6 million. Decreases were reported in imports from all continents except North America and Asia.

Imports from South America fell from \$234.9 million in March to \$198.1 million in April largely due to decreases in imports from Brazil, from \$57.5 to \$36.0 million; Chile, from \$27.7 to \$18.4 million; Venezuela, from \$85.2 to \$77.4 million; and Peru, from \$18.6 to \$12.2 million. These decreases, however, were partly offset by an increase in

¹On a seasonally-adjusted basis, total general imports were valued at \$1,423.3 million in April as compared to \$1,484.3 million in March. (See the April 1963 issue of Report No. FT 900-I.) Seasonally-adjusted data are not available by country of origin.

imports from Colombia, from \$14.2 to \$27.6 million. The decrease in imports from Europe from \$433.7 to \$413.6 million reflected lower levels of imports from individual countries of this continent as follows: United Kingdom, from \$100.8 to \$84.6 million; Turkey, from \$15.9 to \$9.4 million; Italy, from \$46.7 to \$42.6 million; and Spain, from \$12.4 to \$8.8 million. However, imports from West Germany advanced from \$83.6 to \$91.2 million. Imports from Australia and Oceania decreased from \$42.4 to \$31.2 million owing chiefly to decreases in imports from New Zealand and Western Samoa, from \$20.3 to \$12.4 million and Australia, from \$21.7 to \$18.5 million. Imports from Africa declined from \$70.3 to \$67.4 million as a decrease in imports from Republic of South Africa, from \$28.0 to \$13.6 million, was largely offset by increases in imports from Ghana, from \$3.3 to \$9.1 million; Ethiopia, from \$5.7 to \$9.2 million; and Federation of Nigeria, from \$4.4 to \$7.3 million.

Imports from North America rose from \$416.5 to \$474.0 million. This change was mainly due to increases in imports from Canada, from \$285.2 to \$327.1 million; Dominican Republic, from \$5.9 to \$11.6 million; and Netherlands Antilles, from \$18.3 to \$21.9 million. Imports from Asia advanced from \$265.1 million in March to \$276.7 million in April as a rise in imports from Iran, from \$5.2 to \$13.6 million and Republic of the Philippines, from \$25.6 to \$31.6 million, was partly offset by a decrease in imports from Saudi Arabia, from \$8.3 to \$3.8 million.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, landing, or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such mercantile or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude

United States import duties. None of the values have been adjusted for changes in price level.

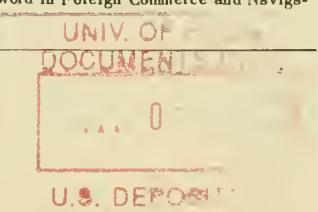

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under \$100 and all informal entries valued under \$250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than \$50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: APRIL 1963 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into bonded warehouses. Data revised to reflect all corrections published with the statistics through those for December 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)
